

Drain DEFENDER

Proprietary compounds that will combat: Fruit Flies, Grease, Grime, Fats, Oils, Molds and Malodors

Drain-Net's Drain DEFENDER line of products replaces expensive and often hazardous chemical products currently used in the industry to combat fruit flies, grease, grime, fats, oils, molds and malodors. These caustic products invariably do more harm than good. However, our DEFENDER products consist of all-natural, eco-friendly proprietary compounds that will not damage your pipes or drain systems.

Moreover, when used properly in conjunction with each other, Drain DEFENDER products will not only remedy the above issues, but also prohibit fruit flies from reproducing, thus eliminating them completely from the treated areas.

The Drain DEFENDER line of products are light years ahead of any other cleaning and drain solution products on the market today and will save you time, money, and hassle when it comes to keeping your spaces clean and fruit fly free!

DRAIN DEFENDER SYSTEM™
(1) 5" Drain Cover (1) Small Basket
(1) Drain Strainer

The DEFENDER™
(6) Compound Discs

Sink DEFENDER™
(3) Round Balls

Beverage Tray DEFENDER™

**“Easy Open”
Floor Drain Cover**

Drain DEFENDER’s new and advanced drain conditioning system replaces your existing floor drain cover with our unique, interactive, drain cover-basket system.

Our **“Easy Open” floor drain cover** is:

- Manufactured using industrial grade, 16-gauge, double-layered stainless steel.
- Allows for convenient removal and cleaning of basket as well as easy access to place our proprietary all-natural and eco-friendly DEFENDER disc.

Our revolutionary **Drain Defender System**:

- Withstands the rigors of a commercial kitchen environment
- Abates fruit fly infestation
- Keeps drain lines free of fats, oils, greases, molds, and malodors
- Can include a Drain-Net strainer to prevent food, trash, and debris from clogging pipes

“The Drain Defender products were tested in two of my stores for 60 days. I was surprised when even after the first few days of testing, we noticed a striking improvement to our drain system, our floors never looked better and after a week the fruit flies were completely gone.”

--Dennis
McDonald’s Owner/Operator

UltraFloor DEFENDER focuses on grease / food waste accumulating on the floor, in grout and cracks, around the drains, under equipment, and hard-to-reach areas. Decaying waste on the floor can quickly become odorous, which attracts fruit flies, roaches, and other disease-spreading parasites.

- Designed for floor and grout
- Cuts grease build-up, fatty acids and dirt
- Proprietary blend of surfactant agents, including active bacteria
- Reduces slippery floors
- Twice the fighting action when you rinse down the drain with our proprietary disc

Drain DEFENDER

How does the **Beverage Tray DEFENDER** work?

- 1) Put the proprietary disc in your beverage tray
- 2) As ice melts, the slow-releasing disc releases the proprietary bacterial formula throughout the drainline.
- 3) The active bacteria eliminates fruit flies, mold, odors, and can even clean up the drain line.

The **Fruit Fly Fighter** eradicates fruit flies in hard to reach and concentrated areas of fruit fly population. Spray our proprietary, bacteria based, eco-friendly product on your non-food contact surfaces and let Fruit Fly Fighter wage war on your dirt, grime, grease, and fruit flies!

The **FloorSink Defender** is a specially engineered device that is designed to fit within your floor sinks. FloorSink Defender takes advantage of our proprietary compound to eliminate fruit flies, oils, fats, greases, and odors that can cause problems. It works as part of the Pure Drain DEFENDER line of products to keep your drains clean!

Sink DEFENDER is a small plastic ball filled with the same proprietary compound as our Drain Defender System. The Sink Defender is an effective release mechanism to prevent fruit flies, remove odors, and keep drain pipes clear.
